Midwest Printed Circuit Services, Inc. Policy on Conflict Materials

Midwest Printed Circuit Services is concerned about the use of natural resources to fund the armed conflict in the Democratic Republic of the Congo. We do not use any Conflict Materials or their derivatives in Midwest Printed Circuit Services products, it is our policy to avoid the use of materials from such sources and continue to work with our vendors to maintain this status of compliance.

Dodd-Frank Wall Street Regulation and Consumer Protection Act

The Dodd-Frank Wall Street Reform and Consumer Protection Act, signed by President Obama on July 21, 2010, are new requirements for manufacturers of products containing tin, tantalum, gold, tungsten, or any other “conflict metals”. Specifically, section 1502, of the new law imposes direct SEC reporting requirements on any publically traded companies whose products contain metals derived from conflict materials. Conflict Minerals are mined in or near areas such as the Democratic Republic of Congo (DRC), which benefit armed groups committing violence in the DRC. The Dodd-Frank Wall Street Regulation and Consumer Protection Act define “Conflict Minerals” as: gold, tantalum, tin, tungsten, or any other mineral or its derivative determined by the U.S. Secretary of State to be financing conflict in the DRC or an adjoining country.

Midwest Printed Circuit Services uses the previous mentioned materials, excluding tantalum in our products. Not every product contains every metal or metal at all. Some of the products may contain only one of the previous mentioned metals, excluding tantalum. Although Midwest Printed Circuit Services is not publically traded, many of our customers are members of the New York Stock Exchange. It is our due diligence to provide them with the knowledge and security Midwest Printed Circuit Services products are derived from Conflict-Free Minerals.

What will Midwest Printed Circuit Services do to prevent the introduction of Conflict Minerals into our Supply Chain?

Midwest Printed Circuit Services will continue to work with our suppliers to help them understand the issues around Conflict Minerals and to ensure the origin of the metals in components and materials are derived from Conflict Free Minerals.

Joseph C. Fehsenfeld
